

"It's only one plastic bottle,"
said 8 billion people.

WHAT'S THE BIG DEAL ABOUT PLASTIC?

THE PROBLEM

The problem with plastic is that there is way too much of it being produced. That's an issue because of what it's made from - fossil fuel and toxic chemicals - *and* how it acts.

THE IMPACTS

Why should you care? Well, there are 3 main impacts of plastic production - and all of them affect you, so it's good to know about it!

- Plastic destroys ecosystems
- Plastic affects your health
- Plastic accelerates climate change

We'll be looking at these in depth in the next modules. But first, let's get the big picture view.

Do

What things do you / your family buy in plastic?

Look around you, where do you see plastic? It's not always obvious!

Can you reach 100+ items in one day?

Reflect

Plastic is everywhere in our lives but it's causing a lot of problems. What can we do about this?

💡 *Think about what plastic is used for. Are all of these things necessary?*
